How to complete an Application for Registration of a Litter

Please tick boxes provided to check that all details for your litter have been completed. This will allow your litter to be processed as quickly as possible without unnecessary delays.

Correct Date of Birth Correct Mating Dates Dam and prefix in the **same** ownership Microchip Numbers for sire and dam and puppies in litter Signed by the owner of the stud dog who is a financial member Declaration by breeder details completed and signed by all registered owners

After the 1st October 2005 litters will not be registered in the records of the TCA Inc unless the Sire, Dam and all progeny are microchipped.

The following is a step-by-step process for completing the Application for Registration.

1. The breeder of the litter should complete the details for the Dam including her microchip number.
2. The Certificate of Service and Sire's details should be completed by the owner of the stud dog. If the dog is registered in the records of the TCA Inc it is compulsory for the dog's microchip number to be included on this application. Where the Sire is registered in the records of another recognised body and is not microchipped this requirement is waived.
3. Fill out the first and second choice of names and note if the puppy is to be registered in the Main (MR) or Limited (LR) Register. Note the sex of puppy Dog (D), Bitch (B) and any special colour or markings.
4. If the puppies have been microchipped prior to completing this Application for Registration of a Litter, include the microchip number in the appropriate box.
5. The application should be signed by owners of the dam, which should be the same as the registered owners of the prefix.
6. Once the application is complete, forward it with the appropriate fee to the office of the TCA Inc.
7. If the application is made before the puppies are microchipped the office of the TCA Inc will record the litter and allocate registration numbers to each puppy. A copy of the application will then be forwarded back to the breeder as proof that the puppies are to be registered.
8. Certificate of Registration papers will not be issued until such time as the puppies have been microchipped and their microchip numbers recorded by the office of the TCA Inc.
9. When the puppies are microchipped add their microchip number to the copy of the application for registration and have it signed by the veterinarian or approved implanter who microchips the puppies and forward it to the office of the TCA Inc for completion of the registration process.
10. **Litter Registration Limitations apply to the following breeds:-**

Australian Shepherds, Bedlington Terriers, Flat Coated Retrievers, German Shepherd Dogs, Golden Retrievers, Labrador Retrievers, Rottweilers.

Please check with the office prior to submitting your litter registration form if you are unsure of the requirements for your breed.
